## EXO® AP HOOK

The EXO AP HOOK is a personal escape system with a HOOK anchor hook, adapted for situations where the possibility of finding an anchor point is uncertain. It has a self-braking system with anti-panic function for quickly moving horizontally, climbing through a window and controlling and stopping a descent. If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically. The EXO AP HOOK also includes a rope that is resistant to wear and high temperatures, an Am'D connector with CAPTIV positioning bar, and a bag for transporting and attaching the system directly to the harness. Other rope lengths and other types of connectors (such as the EASHOOK OPEN) are available by special order.

If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically.

The anchor hook may be used around a structure, secured with a locking hitch.

Extend the usable life of your EXO AP HOOK with replacement rope (with or without the HOOK) available as a spare part.

---

Short Description    Personal escape system with anchor hook

---

Selling Points

- Multipurpose HOOK anchor hook is versatile and designed to be used where the possibility of finding an anchor point is uncertain Can be used in two ways:
  - Around a structure secured with a locking hitch
  - On a window sill as a last resort
- Self-braking system with anti-panic function for:
  - Rapid horizontal movement
  - Going out a window
  - Controlling and stopping a descent: if the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically
  - Limiting the force transmitted to the user in the event of a fall
- 7.5 mm static aramid fiber rope, 15 m in length, resists abrasion and high temperatures
- Am'D connector with CAPTIV positioning bar to keep the connector oriented in the right position and integrated with the device
- Fire-resistant carry bag to attach the system directly to the harness
- User-repairable, the EXO AP HOOK has available spare parts to help extend its usable life
- Available in other rope lengths and with other types of connectors (such as the EASHOOK OPEN) by special order
